

KLeader Video Animation Creation Requirement Profile

Highlight bullet point

1 Video's Main Purpose.

2 The dimension of the Projection or Led ,resolution,pitch.

3 Main Objects contained in video and how they motion?

4 Probably deadline of the video creation, The longer we can work, the lower your cost!

5 Are you willing to tell the budget or how long is the time length of the video file?

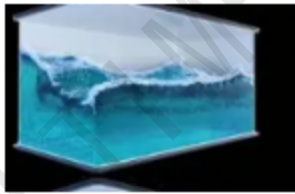

6 Are there any reference pictures or videos?If not, don't worry, we can deal with it.

7 Have you got any detailed scripts? Such as What does the video play at a certain period! If you have, we can give you a very accurate quotation.

Example for requirement profile

1. Outdoor LED Naked3d Video

I'm a wine manufacture. I want to reflect its characteristics, highlight its brand by outdoor LED advertisement. The wine bottle bobs on the waves, occasionally hit the glass, as the time goes on, breaks the glass then bursts out! The time length of the video file lasts about between 20 to 30 seconds. My screen dimension is 8 meters long side, 6 meters short side, 6 meters high. The budget is no more than \$10,000. The reference figure is as follows

2. 3D mapping or architectural projection

There's a special relief embedded in the wall of my bar, the figures and the size is as follows. I want to color her with projections and give her a variety of expressions to make her look more dynamic. The girl comes from different continents. In order to show different expressions, you should display four seasons' change. At the beginning of the spring, thunder and lightning effects must be contained. They are the symbols of the spring. I've 3 HD projectors. Projectors resolution is 1920 * 1200. The time length of each is about from 15 to 20 seconds, transition animation last 20 seconds. In total 90 seconds. I must get the final video file in two weeks.

Hint

Although it requires you write down some bullet points for accurate communication, it's very worth. If you just inquire how much per second, it's meaningless and inaccurate. Some suppliers offer lower prices to attract customers, but there will be additional costs in the later period.

Contact KLEADER for budgeting, it's reliable.
